Rinkal Yadav

Software Engineer — Java Backend Developer
+91-9170285408 | rinkalbyadav@gmail.com | LinkedIn: Rinkal-Yadav | Bengaluru, India | Portfolio

PROFESSIONAL SUMMARY

Java Backend Developer with **2+ years of experience** designing and developing scalable backend applications for **e-commerce** and **hospitality** platforms. Skilled in **Java 8+, Java 17, Spring Boot, Spring Cloud, Hibernate, JPA, Microservices, RESTful APIs, Apache Kafka, MySQL, MongoDB, Redis, Docker, Jenkins, Maven, Git, JUnit, and Mockito**. Experienced in building high-performance backend services, developing event-driven applications, optimizing database operations, and improving application performance through caching and async processing. Hands-on experience with cloud deployment, CI/CD pipelines, and clean architecture to deliver reliable, maintainable, scalable enterprise applications.

KEY ACHIEVEMENTS

- Developed and delivered production-ready RESTful APIs for marketplace and hospitality applications.
- Built scalable backend modules using Java, Spring Boot, and Microservices for enterprise applications.
- Optimized database queries and improved backend performance using MySQL, JPA, and Redis.
- Collaborated with cross-functional Agile teams to deliver high-quality features within project timelines.

TECHNICAL SKILLS

- **Languages & Frameworks:** Java 8+, Java 17, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, JPA
- **Architecture & Design:** Microservices, Spring Cloud (Eureka, API Gateway, OpenFeign), RESTful APIs, Design Patterns
- **Security:** Spring Security, JWT, Role-Based Authorization
- **Databases & Caching:** MySQL, MongoDB, Redis — query optimization, indexing
- **Cloud & DevOps:** AWS (EC2, S3), Docker, Jenkins, CI/CD Pipelines, Maven, Linux
- **Messaging & Streaming:** Apache Kafka — async event processing, inter-service communication
- **Testing & Code Quality:** JUnit, Mockito, TDD, SonarQube, Code Reviews — 78%+ unit test coverage
- **API & Documentation:** Swagger / OpenAPI, Postman, RESTful API design & versioning
- **Tools & IDEs:** Eclipse, IntelliJ IDEA, Git, GitHub, JIRA, Confluence
- **Frontend:** Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap

PROFESSIONAL EXPERIENCE

E-Mech Solutions Private Limited ● Aug 2024 – Present

- Designed and implemented **RESTful APIs** for product catalog, inventory management, booking, order processing, and payment workflows.
- Built **Apache Kafka**-based event-driven solutions for order updates, booking notifications, inventory synchronization, and asynchronous communication between microservices.
- Improved application performance using **Redis caching**, MySQL query optimization, database indexing, and efficient JPA data access.
- Worked with **MySQL** and **MongoDB** to develop reliable, high-performance data storage solutions for enterprise applications.
- Automated application deployment using **Docker, Jenkins, AWS, and CI/CD pipelines**, ensuring smooth and reliable software releases.
- Developed unit and integration tests using **JUnit** and **Mockito**, maintaining code quality through peer reviews and clean coding practices.
- Created **Swagger/OpenAPI** documentation and collaborated with product owners, QA engineers, and development teams in **Agile/Scrum** environments to deliver production-ready backend solutions.

KEY PROJECTS

▸ **LG – Microservices-Based E-Commerce Platform**

- **Domain:** E-Commerce / Multi-Vendor Marketplace — product catalog management, seller and customer management, inventory, shopping cart, order processing, checkout, payment workflows, and inter-service communication.

- Developed scalable backend services for seller onboarding, product catalog, shopping cart, checkout, order processing, and customer management using **Java 17, Spring Boot, Spring Data JPA, Hibernate, and MySQL**.
- Designed a **microservices architecture** with independently deployable **User/Authentication, Product, Inventory, Cart, Order, and Payment** services.
- Implemented **Spring Cloud Netflix Eureka** for service registration and discovery, **Spring Cloud API Gateway** for centralized routing and request management, and **OpenFeign** for synchronous inter-service communication.
- Used **Apache Kafka** for asynchronous, event-driven communication between services.
- Secured REST APIs with **Spring Security and JWT** for authentication and role-based authorization.
- Built and maintained RESTful APIs to support product listings, inventory updates, pricing, cart operations, and order lifecycle, improving API response time by **35%**.
- Designed JPA/Hibernate entity mappings and optimized SQL queries for efficient handling of products, sellers, customers, and orders across multiple modules.
- Integrated payment gateway and shipping providers with secure validation, exception handling, and transaction processing to ensure reliable order fulfillment.
- Implemented Redis caching, pagination, and database indexing for frequently accessed data, reducing page load time by **40%** during peak traffic.
- Collaborated with frontend, QA, and DevOps teams to deliver new features, resolve production issues, and ensure smooth deployment through Agile development practices.
- Wrote unit tests using **JUnit 5** and **Mockito**, maintained API documentation and testing with **Swagger/OpenAPI** and **Postman**, participated in code reviews, and followed **SonarQube** quality standards to maintain clean, reliable, and maintainable code.
- Used **Git/GitHub**, **Maven**, **Docker**, **Jenkins**, **CI/CD pipelines**, **AWS EC2/S3**, and **Linux** to support version control, automated builds, deployments, and cloud-based application hosting.

▸ **FabHotels Property Booking Platform** — *Hospitality · Property Booking*

- **Domain:** Property search, room availability, booking management, payment processing, and cancellation workflows for a hotel booking platform.
- Developed **RESTful APIs** for property search, room availability, booking confirmation, payment processing, and reservation management.
- Built backend modules for **dynamic pricing**, seasonal rate management, and hotel availability across multiple properties.
- Improved API response time by **35%** through MySQL query optimization, database indexing, and efficient JPA data access.
- Automated application deployment using **Docker**, **Jenkins**, and **CI/CD pipelines** to support reliable software releases.
- Improved application quality through **JUnit**, **Mockito**, **SonarQube**, structured logging, and code reviews while following Agile development practices.

EDUCATION

BCA — Bachelor of Computer Applications
Mahatma Gandhi Kashi Vidyapith Varanasi University | Ramdev pg college Jungiganj bhadohi

CERTIFICATIONS

- Spring Boot & Microservices Development Certification
- Apache Kafka Messaging — Confluent Basics

SOFT SKILLS

Analytical Problem-Solving • Cross-Team Collaboration • Adaptability • Time Management • Clear Communication • Ownership & Accountability
