

RINKAL YADAV

Java Backend Developer | Spring Boot | REST APIs | MySQL

Bengaluru, Karnataka, India | +91-9170285408 | rinkalbyadav@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Java Backend Developer with hands-on experience building enterprise banking applications using Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, and JWT. Skilled in designing secure RESTful APIs, optimizing MySQL queries, and implementing layered architecture and SOLID principles. Experienced in Agile teams, API testing with Postman, and collaborating across QA and frontend to ship reliable, production-grade backend systems.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, TypeScript

Backend: Spring Boot, Spring Framework, Spring MVC, Spring Data JPA, Hibernate, JDBC

Security: Spring Security, JWT Authentication

Databases: MySQL, Redis

Frontend: Angular, HTML5, CSS3, JavaScript, TypeScript

Testing & Tools: JUnit, Mockito, Postman, Git, GitHub, Maven

Additional Exposure: Apache Kafka, Docker, Docker Compose, Microservices, Spring Cloud, AWS, CI/CD, GitHub Actions, Spring AI, RAG, AI Agents

PROFESSIONAL EXPERIENCE

Software Developer — E-Mech Solutions Private Limited

Feb 2025 – Present

- Developed and maintained backend modules for an enterprise banking application using Java, Spring Boot, and Spring MVC, following layered architecture and SOLID principles.
- Designed and implemented RESTful APIs supporting core banking functionality, integrating with the Angular frontend via consistent request/response contracts.
- Built data-access layers with Spring Data JPA and Hibernate, mapping relational entities to Java objects and optimizing MySQL queries.
- Implemented authentication and authorization workflows using Spring Security and JWT to secure REST endpoints and protect sensitive banking data.
- Implemented business logic including validation rules, exception handling, and data-integrity checks for banking workflows.
- Investigated and resolved backend defects identified during QA and production support through root-cause analysis and targeted fixes.
- Participated in code reviews, unit testing, sprint planning, daily stand-ups, and sprint reviews; used Git for version control.
- Used Postman to test and validate REST API endpoints before QA handoff and frontend integration.

KEY PROJECT

Online Loan Management & Payment Processing System

Domain: Banking & Financial Services (BFSI) | Team Size: 6

- Built backend services and REST APIs for customer onboarding, loan application submission, and document-verification workflows using Java, Spring Boot, and Spring MVC.
- Designed data models and repositories with Spring Data JPA and Hibernate for customer, loan, and repayment data stored in MySQL; wrote optimized SQL for eligibility checks and EMI reports.
- Implemented Spring Security with JWT authentication and role-based access control for sensitive financial operations.
- Developed business logic for credit-score validation, loan-eligibility rules, EMI scheduling, and payment processing.

PROFESSIONAL TRAINING

Software Development Training — Codegnan Destination

Sep 2024 – Feb 2025

- Completed industry-oriented training in Core Java, Advanced Java, JDBC, Servlets, JSP, Hibernate, Spring, Spring Boot, Spring Data JPA, and Spring Security.
- Built and consumed REST APIs, worked with MySQL, tested endpoints using Postman, and developed frontend integration skills using Angular, HTML, CSS, JavaScript, and TypeScript.
- Used Git and Maven for version control, dependency management, and project work.

EDUCATION

Bachelor of Computer Applications (BCA) — Aggregate: 73% | Graduated 2024
